מספר :

To Whom It May Concern:

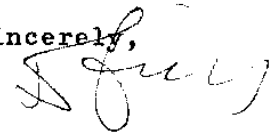

Mr. Lucien Schoppig has been employed as a psychologist in our department for approximately one year. His work has included psychodiagnostic testing and psychotherapy with disturbed children hospitalized in both our open and closed wards as well as children in our outpatient clinic. He has actively participated in staff meetings and has received regular supervision from Mrs. Nira Avron, Chief Department Psychologist, and from myself.

In his therapist-patient relationships, Mr. Schoppig is empathetic and succeeds in establishing a good working rapport. Even in extremely difficult cases he has proven to be persistent in his desire and ability to overcome objectively difficult situations.

Mr. Schoppig has a positive and efficient professional relationship with the department staff and is highly respected and accepted as an integral member of this staff. He is an intelligent and ambitious individual who brings a warm sensitive personality, sense of humor, and reliability to his work.

Mr. Schoppig has a good theoretical background. Given the opportunity to continue his studies and training, thereby developing his potential to the fullest, he will make a fine contribution to clinical psychology.

Sincerely,

Judith Fintea, M.D.
Child Psychiatrist
Department Head
Children's Department
